

IMPORTANT NOTICE TO OWNERS

Capricorn is part of the Telstra Velocity Network that provides high speed Internet, telephone digital TV and pay TV (Foxtel) services to each home, through an underground fibre optic cable. There is no need for either TV aerials or dishes to receive these services.

Your home will, however, need to be correctly wired to be able to use these services.

There are significant advantages to you if the computer, phone and TV cabling are installed while your new home is being built. This will help to avoid delays in connecting to phone and computer services when you move into your new home and enable you to take better advantage of the \$1,500* worth of credit for Telstra services.

Capricorn has agreed for Intelligent Home to be the preferred installer for all lead-in and internal cabling in the Estate. As the only Telstra preferred installer in Western Australia Intelligent Home has the necessary experience to help you to take advantage of this technology.

Intelligent Homes will also provide a free advisory service for all underground fibre connections questions, servicing and installation requests to all residents in Capricorn.

If you have any questions or issues regarding delivery of telephone, TV, Internet and Pay TV services for your home you can contact Intelligent Homes toll free on 1300 652 633. This advisory service is provided at no cost to you.

While the Telstra Velocity cabling requirements can be confusing, Capricorn believes that this new arrangement will help to make the process of connecting your home much easier.

Capricorn will provide your details to Intelligent Homes who may contact you to arrange an obligation free consultation. Capricorn recommends you take advantage of this no obligation service so your home is better equipped to handle the technologies of today and tomorrow.
